

SALES PERFORMANCE ANALYSIS – EXCEL PROJECT

Task 2

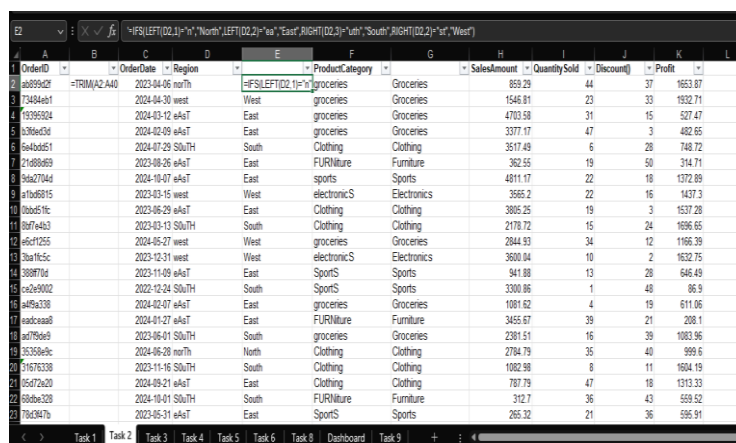

Step 1 - Identify text formatting issues in columns such as Region or Product Category.

Step 2 - Use the TRIM function to remove unwanted spaces and standardize text formatting.

Step 3 - Using (CTRL +H) Find and replace function replace unwanted symbols and extra spaces in column of region and category.

Step 4 - Using IFS formula, each region and category has been changed according to its condition.

Step 5 - Check all cleaned columns for consistent formatting.

Task 1

Step 1 - Open the dataset with order details like Order ID, Date, Region, Product Category, and Sales Amount.

Step 2 - Using the filter feature to show only certain data, like filtering based on Region or Product Category.

Step 3 - Using sorting on columns like Sales Amount or Profit to sort data in ascending or descending order.

Step 4 - Verify that the filtered and sorted data matches the expected results

Task 4

Step 1 - Group data by Product Category and Region.

Step 2 - Calculate the total sales amount for each region using the SUMIF function. To select row (CTRL+SHIFT+DOWN ARROW).

Step 3 - Put down the total sales value for all regions like North, South, East, and West.

Step 4 – Calculate average discount and profit for furniture using AVERAGEIF function.

Region	Sales Amount	Discount(%)	Profit
North	869.29	37	1653.07
South	1546.81	33	1932.71
East	4703.58	15	527.47

Task 5

Step 1 - Establish a PivotTable to summarize Sales Amount and Profit for Region and Product Category.

Step 2 – In pivot field settings drag down Region column headings and Product Categories row headings.

Step 3 - Use Sum of Profit and Sum of Sales Amount as values within the Pivot field setting.

Step 4 - Compute and check overall profit and overall sales across all regions.

Row Labels	East	North	South	West	Sum of SalesAmount	North	South	West	Total Sum of Profit	Total Sum of SalesAmount
Clothing	218161.35	207145.82	224799.76	206240.66	558307.99	575975.88	529704.9	491938.81	856347.49	2156007.58

Task 6

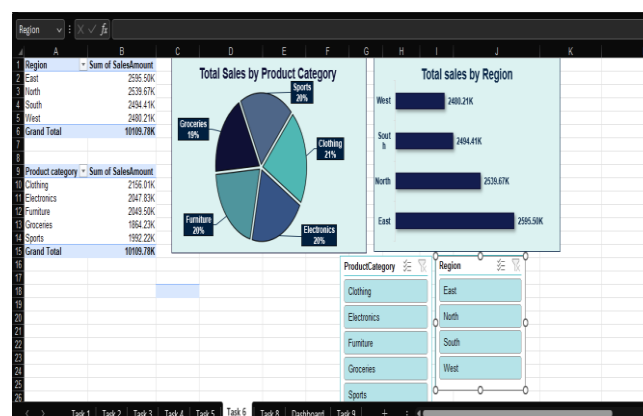

Step 1 - Create a summary table indicating the overall sales for each Region and another table sales for product category.

Step 2 - Apply the PivotTable formula to obtain total sales by region and category in separate table.

Step 3 – And add slicers for the table in region or category, make report connection to the tables.

Step 4 – To add chart in sheet, go to insert and select pivot chart according to data chart is added.

Step 5 - Verify that the totals are accurate as compared with previous steps from other tasks.

Task 8

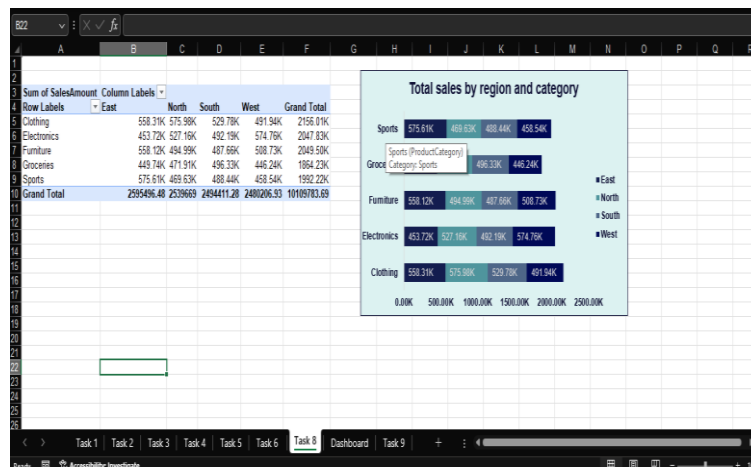

Step 1 - Create a PivotTable and add a bar chart for displaying Sales Amount by Product Categories and Regions.

Step 2 – Set Product Categories as row headers and Regions as column headers in pivot field setting.

Step 3 - Insert the Sum of Sales Amount to see distribution of sales.

Step 4 - Add a Grand Total column and row to tally all sales.

Step 5 - Check the PivotTable for correctness in totals and category alignment.

Dashboard

Step 1 – By selecting all in cell using CTRL+A, reduce the length of rows and column to select multiple of cell easily.

Step 2 – Select the cell for dashboard heading and the merge that selected cell by merge cell option in home tab.

Step 3 – Continuing the above same steps for KPI of total sales, total profit and highest selling product.

Step 4 – Insert charts and slicers for dashboard and arrange it in properly.

Step 5 - At final go to view tab remove gridlines, formula bar and heading in dashboard sheet.

Step 6 – Check for the connection of chart and slicer in dashboard.
